INFORMATICS COLLOQUIUM

Speaker:

Dr. Pablo Molina, Georgetown University, USA

Doing IT Right

Abstract:
Cambridge Analytica, Facebook, YouTube, Equifax, the US Office of Personnel Management, fake news, ransomware… a faulty moral compass for technology decisions costs organizations much money and reputation. Join Dr. Pablo Molina in exploring important ethical issues when using information technology personally and professionally, including codes of conduct, privacy, security, intellectual property, governance, inclusiveness, diversity, and laws and regulations. We must think critically to reflect on what emerging technologies like drones, driverless cars, the Internet of Things, big data, and artificial intelligence mean to humanity.

Bio:
Dr. Pablo Molina is the AVP and Chief Information Security Officer at Drexel University in Philadelphia and a Faculty Lecturer at Georgetown University in Washington, DC. He serves on the board of the Electronic Privacy Information Center and is the Executive Director of the International Applied Ethics and Technology Association. Dr. Molina is visiting with Dr. Philippe Cudre-Maroux at the University of Fribourg, Department of Informatics, on a Fulbright Specialist grant from the US Department of State.
